

— THE CONCEPT

BEHAVIOR SHOULD BE PORTABLE

Capture a behavior once — reach, grasp, carry, place
— and hold it on one engine-independent timeline.
Vision, language, and motion aligned frame by
frame, so every renderer, model, and body reads out
of the same source.

ADAPTERS

0

REBUILT PIPELINES

THE FIFTH CONSUMER SHOULD COST ONE ADAPTER — NOT ONE MORE PIPELINE.

ONE TIMELINE. MANY ENGINES.
